

Product Update

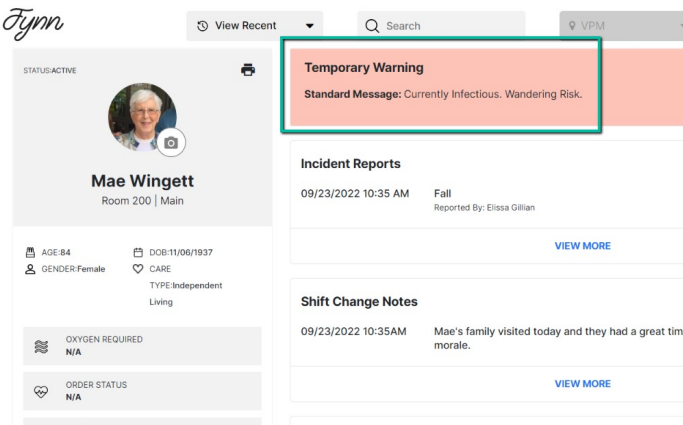

Version 1.1.0 Release

We heard your feedback! Check out Fynn's latest updates.

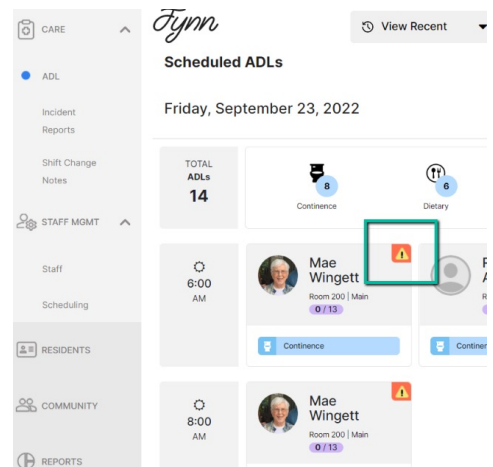

Product Enhancements

Temporary Warnings

Temporary Warnings are a new feature that can be added per resident. If a resident has a temporary warning, it will show on the Resident Page and a "warning" icon will show on the resident tile on the Scheduled ADL page.

Temporary Warning on Resident Page

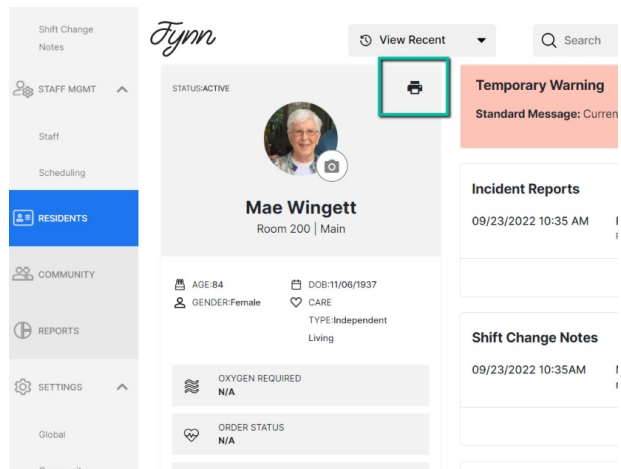

Temporary Warning Icon on Scheduled ADL

Printing

You can now print the 'Resident Profile Page' to use as a Face Sheet.

You can print the Incident Report too!

Select the Print icon to print the Resident 'Face Sheet.'

Product Update

ADL Enhancements

All 4 behaviors on an ADL are required when signing off to complete an ADL

On the Scheduled ADL page, we removed the time block when there are no ADLs to complete at that time. If all ADLs for a given time slot are complete, then the time slot will not appear on the Scheduled ADLs page.

Resolved Issues

Auto-assign in Tasks

When creating tasks, the task will auto-assign to the person logged in. Not to worry, tasks are still able to be assigned to any user!

Faster Load Times

The Scheduled ADL page is now a faster user experience!

Edit Shift Change Notes

Shift Change Notes are now editable.

Incident Report Dates

The Incident Report had blank start and end dates when using a tablet. We adjusted so the range will always auto-populate to the last 30 days but you can change it at any time!
